Note: There were some difficulties in recording accurate finish times from the north bank. Some errors were evident. The GPS finish times are not 100% accurate but were nonetheless used in the final results where they were more than a 1 min 30 sec discrepancy between it and the manual time. Four boats (in blue) have been given faster times and seven crews (in brown/beige) have been given slower times - sorry! There was no effect on prizes.

Note: These are times recorded by the GPS system and may not be exactly on the timing lines, especially relevant at the finish. The system only takes a position every 30 seconds or so. Splits and finish time are calculated using the actual start time and the GPS recorded time at points 2 to 5.
